

5 mm RGB LEDs & 10 mm RGB LEDs

Evil Mad Science LLC

<http://evilmadscience.com/>

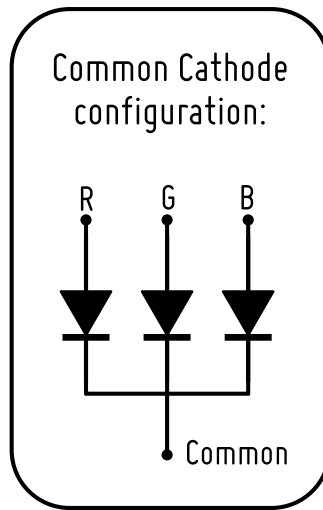

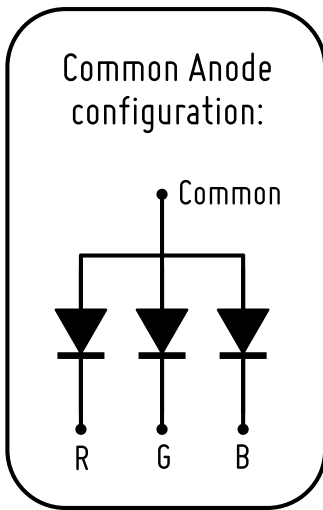

Lenses are either clear or diffused:

Diffused (milky white) for widest viewing angle.

Water clear lenses project light in a narrow angle.

Maximum continuous current: 30 mA each for red, green, and blue

Our 5 mm and 10 mm diffused-lens RGB LEDs are available in both (standard) Common Anode and Common Cathode versions.

Manufacturer part numbers:

Diffused-lens LEDs, 5 & 10 mm

BL-L515RGBW-CA/CC for 5 mm LEDs,

BL-L105RGBW-CA/CC for 10 mm LEDs

Clear-lens, 10 mm, common anode:

BL-L105RGBW-CA
